Hello! I'm an experienced web professional, originally from Melbourne, Australia but now settled in Leeds, UK. I love making clean, beautiful, performant websites – maybe we should work together?

Experience

The Site Doctor / Senior Front End Developer
2017 – PRESENT, REMOTE

The Site Doctor specialises in bespoke e-commerce websites, usually built on an Umbraco/uCommerce platform.

I build the front end for our projects using Sass/CSS, HTML, JavaScript/jQuery, and Gulp as my task runner.
I also introduced Vue.js as the framework for a number of sites, utilising Vuex or Pinia and working with a REST API.

The entire Site Doctor team work remotely, using Slack and Teams for communication and GitHub for source control.

Incuna Ltd / Senior Front End Developer
2016 – 2017, OXFORD UK

Incuna specialised in innovative, bespoke web applications for the healthcare industry. I used GitHub, JIRA, and Slack on a daily basis for source control and communications. I developed using Sass/CSS3, JavaScript/jQuery, HTML5 and some Django, with Grunt as a task runner to automate the build process. I also mentored junior members of the development team and assisted project managers with project scoping.

SIMB / Director
2006 – 2015, MELBOURNE AUSTRALIA

My husband and I ran a small web development business together for a number of years before we moved to the UK. We worked directly with clients to gather requirements, produce specifications, design, build and deploy websites and mobile applications. We also worked with a number of creative agencies to build the designs they supplied us. My responsibilities were varied, and included responsive web development, EDMs (MailChimp and Campaign Monitor), and graphic design (for both digital and print applications).

Education

RMIT / Graduate Diploma in Graphic Design
2004 – 2006, MELBOURNE AUSTRALIA

Monash University / Bachelor of Science
2001 – 2005, MELBOURNE AUSTRALIA

Graduated with first class honours. Deans List scholar. Accepted into PhD candidature, awarded APA scholarship

Key Skills

- HTML, Sass/CSS, Javascript, jQuery
- Vue.js, Umbraco
- Git
- Adobe XD, Photoshop, Illustrator

- I'm able to work efficiently independently or as part of a team.
- I love a greenfield project but I'm also happy to jump into an existing codebase.
- I enjoy crafting and implementing designs to create engaging user experiences.
- I'm happy to communicate directly with clients when needed.
